

Features

Robust case with strong motor.

Projection screen fabrics comply with the highest standard for fire safety (M1).

Pre programmed mechanical fine tuning of the extending/retracting of the projection screen fabric facilitates rapid installation.

Strong motor with 5-year guarantee and CE quality mark.

Mounting via 3 brackets at top or back of case.

Options

- ▶ Screen fabrics Matte White P and Matte White Sound.

Accessories (see pages 72-73)

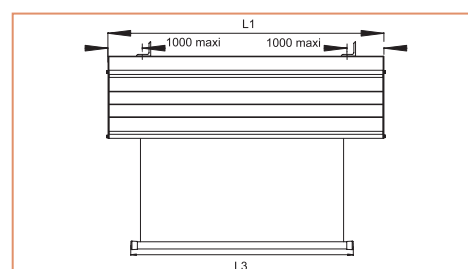

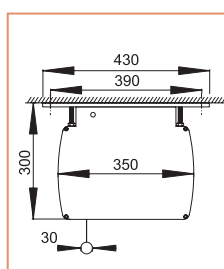

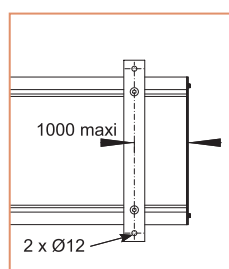

- ▶ Infrared remote control (IR) 10800058
- ▶ Radio frequency remote control (RF) 10800055
- ▶ Key switch to prevent undesired use. 10800009

- ▲ **Large image projection screen available in 2 sturdy screen fabrics in widths from 7 to 10 metres.**

Technical characteristics

- ▶ Sturdy case equipped with anodised aluminium at the front and back and steel at the top, painted in grey (RAL 7035).
- ▶ Matte White P: vinyl film; gain 1.0 and viewing angle 50° L/R.
- ▶ Matte White Sound is a perforated Matte White P projection screen fabric (7% less light output than Matte White P), so that sound systems may be placed behind the projection screen fabric.
- ▶ The projection screen fabric has a horizontal seam which is invisible during projection. With Matte White P this seam is placed every 1.9 metres, and every 1.4 metres with the Matte White Sound.
- ▶ Screen fabrics satisfy the requirements for fire resistance of construction materials and components.
- ▶ All electrical projection screens satisfy the following product safety standards: IEC 60335-1; IEC 60335-2; DIN 19045-5 and IEC 61000 for Electro Magnetic Compatibility.
- ▶ Somfy motor mounted on the right with 17 RPM (12 RPM with 10-metre width) and 320 Watts. Motor with 5 years guarantee.
- ▶ Motor equipped with electric brake to prevent unwanted roll out and thermal overload cut-out.
- ▶ Available with a 10-metre connection cable and separate switch.
