Panasonic®

Remote Control Operating Guide

LCD Projector

Model No. **PT-AE2000U**

Features

Multiple home theatre system devices can be operated.

Devices such as projectors, DVD players/recorders, video decks, TVs, amplifiers, lighting device and electronic screens can be operated.

P.3

Remote control signals for other home theatre system devices can be set into this remote control.

Remote control signals for other home theatre system devices can be easily learnt.

Remote control signals for other home theatre system devices can be easily learnt for each corresponding button on this remote control.

P.6

Device codes can be entered
You can enter device codes to register several remote control signals all at once.

P.7

Macro function makes operation even easier.

Using the operation macro function

A single button operation can invoke a maximum of 16 keypresses to carry out a total of 6 different operations for home theatre system devices.

P.9

Using the power supply macro function

A single button operation can turn the power supply for up to 8 different devices on and off at the same time.

P.11

Frequently-used functions can be programmed into function buttons.

Functions that you use often can be assigned to function buttons, so that these buttons can be used easily as shortcut buttons.

P.12

Customised display of frequently-used functions on the LCD is possible.

You can edit the characters that are used to indicate function buttons in the LCD, and you can also edit the device selection display.

P.14

Contents

Note:
● Do not use the remote control to operate any other equipment apart from your home theatre system.
● It may not be possible to operate some devices using this remote control.

■ This remote control can be used to carry out simple setting operations for your home theatre system in addition to operating the projector (PT-AE2000U).
■ Be sure to read this Remote Control Operating Guide carefully in order to use the devices safely.
■ Also be sure to read the instructions for the projector and the home theatre system carefully when using the remote control.
■ After reading this Operating Guide, keep it in a safe place for later reference

TQBJ0242

Names and functions of each part

● Buttons shown in this colour are buttons that can be used for learnt functions.
  Buttons that cannot be used for learnt functions ···LEARN, SETUP, system device selection
  Buttons that cannot be used for learnt functions when using a projector (PJ)··· MENU, ENTER, RETURN,▲▼▶◀

● If you press any of the buttons marked as Projector function only , the device selection will switch to "PJ".
  (※"PJ" ☞ p.15)

Remote control emitter

Projector function only

This turns the projector power on and off when the projector's power is turned on

Liquid crystal display
The top shows the selected device, the bottom shows the functions of that device that can be operated. (※☞p.15)
If no remote control operations are carried out for 30 seconds or more, the LCD will switch off. If the LCD switches off while the device selection indicator for any component is flashing, the component that was last selected will be the one that will be operated.

Function buttons(A/B/C)

This displays menus

Projector function only

This returns menu adjustment values to their factory defaults.

This adjusts the picture size and focus.

This switches the input source.

This switches the aspect ratio (the ratio between width and height of the screen).

This switches the picture mode.

This displays the input waveforms.

This turns on button illumination for the remote control.
If no remote control operations are carried out for 30 seconds or more, the backlight will switch off.
Once the backlight has turned off after 30 seconds, it can be turned back on by pressing any button.
If you press a button to turn once more and then press it again within 30 seconds to turn the backlight off again, the backlight will not turn back on again when another button (other than "LIGHT") is pressed.

System device operation buttons
These buttons are used to operate system devices using preset functions for this remote control and also functions which have been learnt through signals from other remote controls.

These buttons are used for menu screen operations.

Projector function only

This momentarily pauses images.

This sets the time to elapse before the power turns off automatically.

This displays the "MEMORY LOAD" menu.

This displays the "COLOUR MANAGEMENT" menu.

**This displays the "PICTURE ADJUSTMENT" menu.**

> **Note:**
> ● If operating the remote control by facing it directly towards the remote control receiver at the front of the projector, the remote control should be within approximately 7 metres of the front of the remote control receiver. In addition, the remote control can be operated within an angle of +/- 30 degrees up, down or to the left or right.
> If there are any obstructions between the remote control and the remote control receiver, the remote control may not operate correctly.
> ● The projector can be operated by reflecting the signals from the remote control off the screen, but the operating range for the remote control may be reduced as a result of losses in the amount of light reflected due to the characteristics of the screen.
Operation Quick Guide

Operatinon

■ Operating the projector

**1** Press "DEVICE"to select the projector, and then press "ENTER".

(Example: When "DVD" is selected)
Alternatively, press any one of the buttons marked as "Projector function only".

Operation will change from home theatre system devices to the projector.

■ Operating the home theatre system

1 Press "DEVICE", tilt the button to select the device to be operated, and then press "ENTER".

(Example: When "DVD" is selected)

2 Press the button for the desired operation.

(Example: When playback is selected)

Learning remote control signals directly from home theatre system devices
**Operations can be learnt for buttons one by one.**

Note:
● Remote control signals that are not infrared-type (wave format) signals cannot be recorded.
● It may not be possible to record some types of signal. There is a limit to the number of buttons that can be learnt.
● The maximum number will vary depending on the remote control signals that are learnt, but generally the maximum number of keys that can be learnt is about 80.
● It may not be possible to learn remote control signals correctly if the remote control's batteries are nearly spent.

■ Using the learning function

1 Press "LEARN" for 3 seconds or more and then press "ENTER".

2 Press "DEVICE"to select the home theatre system device to be set.
(Example: When "DVD" is selected)

3 Place the projector's remote control next to the emitter of the home theatre system's remote control.

Approx. 5 cm

4 Press the button on the projector's remote control that you would like to learn, and after "LEARNING?" is displayed, press the corresponding button on the home theatre system device's remote control.

(Projector's remote control) (Home theatre system's remote control)

After 5 seconds

(Example: When learning the function of the playback button)

● **If "ERROR" is displayed**
To learn another button, repeat step 4.
If an operation macro has been assigned to the function button, signals cannot be learnt for that button.

● If "ERROR" is displayed, return to step 4.

5 To finish, press "SETUP", and then check operation.

You can tear off this page along the perforation to use it as a quick reference guide.

Operation Quick Guide

Selecting and entering device codes

You can have all remote control signals for a home theatre system device learnt all at once by entering the device code for that device.

Note:

● Two or more equipment codes cannot be entered for the same item of equipment.
● Equipment codes cannot be entered for "PJ".
● For device codes which have a remote control signal for controlling the power supply, the remote control signal for the power supply will be transmitted when the device code is selected.
Turn on the power supply for the device to be operated, and point the remote control towards it to test.
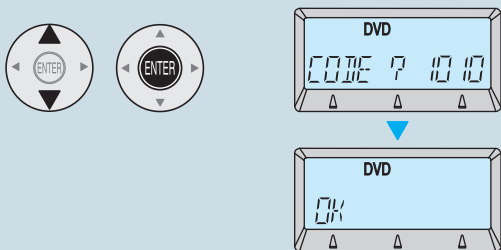

■Setting method

1 Press "SETUP" for 3 seconds or more.

Setting remote control signals for home theatre systems

This remote control is programmed with remote control signals for Panasonic products at the time of purchase. If you would like to operate devices from other manufacturers, or if your Panasonic products cannot be operated, the following setting operations will be required.

Note:
- Do not use the learning function to record remote control signals from other learning remote controls that have been learnt by those remote controls. If this is done, operating errors may result.
- If no operations are carried out for 60 seconds or more during the setup stage, operation will time out and the setting mode will be cancelled.

Setting remote control signals for home theatre systems

To operate home theatre system devices other than the projector, set the remote control signals for operating those devices into the remote control.

Learning remote control signals directly from home theatre system devices
You can freely assign the remote control signals for your home theatre system devices to the buttons of this remote control one by one.

P.6

Selecting and entering device codes
You can have all remote control signals learnt all at once by entering the device code which appears in the device code list .

P.7

Deleting home theatre equipment remote control signals

You can delete remote control signals which have been programmed into the remote control.

### Deleting settings for each button one by one (DELETE)

P.8

Deleting settings all at once (OPS RESET)

P.8

Tip

If you would like to cancel a setting before it is complete··

Press "SETUP".

Tip

To return to the previous step in an operation

Press "RETURN".

Setting remote control signals for home theatre systems

## Learning remote control signals directly from home theatre system devices

Operations can be learnt for buttons one by one.

Note:
- Remote control signals that are not infrared-type (wave format) signals cannot be recorded.
- It may not be possible to record some types of signal. There is a limit to the number of buttons that can be learnt. The maximum number will vary depending on the remote control signals that are learnt, but generally the maximum number of keys that can be learnt is about 80.
- It may not be possible to learn remote control signals correctly if the remote control's batteries are nearly spent.

■ Using the learning function

1 Press "LEARN" for 3 seconds or more and then press "ENTER".

| LEARN | ▶ | ENTER |

PJ
LEARN ?

2 Press "DEVICE"to select the home theatre system device to be set.

(Example: When "DVD" is selected)

DEVICE

DVD
HDD DV/D SUB

3 Place the projector's remote control next to the emitter of the home theatre system's remote control.

Approx.
5 cm

4 Press the button on the projector's remote control that you would like to learn, and after "LEARNING?" is displayed, press the corresponding button on the home theatre system device's remote control.

LEARNING

PLAY   PLAY

▼ After 5 seconds

(Example: When learning the function of the playback button)

DVD
OK

● **If "ERROR" is displayed**
To learn another button, repeat step 4.
If an operation macro has been assigned to the function button, signals cannot be learnt for that button.

● If "ERROR" is displayed, return to step 4.

5 To finish, press "SETUP", and then check operation.

SETUP

Note:
- If the batteries of the remote control are spent, the signals will not be recorded correctly.
- If no operations are carried out for 60 seconds or more during learning, the setting mode will be cancelled. To carry out learning correctly, repeat the procedure from step 1.
- When function buttons A/B/C have been learnt, "-A-, -B-, -C-" will be displayed, and you can edit the characters that are displayed here.
  (☞ p.14)

Tips on correct learning
- Do not move the remote control while learning is in progress.
- Place fresh batteries into both the projector's remote control and the other remote control before starting.
- Avoid carrying out the procedure in places that are exposed to direct sunlight or lights. (Interference may occur and cause errors in learning.)
- The position of the emitter will vary depending on the shape of the remote control. Place the projector's remote control correctly in front of the emitter, and at a distance of 5 cm.

Selecting and entering device codes

You can have all remote control signals for a home theatre system device learnt all at once by entering the device code for that device.

Note:

● For device codes which have a remote control signal for controlling the power supply, the remote control signal for the power supply will be transmitted when the device code is selected. Turn on the power supply for the device to be operated, and point the remote control towards it to test.
● Two or more equipment codes cannot be entered for the same device.
● Device codes cannot be entered for "PJ".
● If the home theatre system device does not support this function, it will not operate when the buttons are pressed.
1 Press "SETUP" for 3 seconds or more.

■Setting method

-Use the projector's menu to make the settings

1 Press "MENU" on either the remote control or the projector's operation panel.

Remote control

Projector's operation panel
2 Press the top or bottom of the tilt button to select "FUNCTION BUTTON" from the main menu and then press "ENTER".

3 Press the top or bottom of the tilt button to select "BUTTON1-3" from the sub-menu and then press "ENTER".

BUTTON 1	HDMI 1 IN
BUTTON 2	HDMI 2 IN
BUTTON 3	HDMI 3 IN

4 Press the tilt button to select the function to be set for the "FUNCTION BUTTON" and then press "ENTER".
● HDMI 1 IN	NORMAL
HDMI 2 IN	DYNAMIC
HDMI 3 IN	COLOR1
COMPUTER IN	COLOR2
COMPONENT 1 IN	CINEMA1
COMPONENT 2 IN	CINEMA2
S-VIDEO IN	CINEMA3
VIDEO IN	SPLIT ADJUST
BLANK	AUTO ADJUST
AUTO SETUP	MEMORY LOAD
CONTRAST	BRIGHTNESS
CONTRAST R	BRIGHTNESS R
CONTRAST G	BRIGHTNESS G
CONTRAST B	BRIGHTNESS B

Note:

● If remote control signals for home theatre system devices or operation macros have been assigned to the "FUNCTION" buttons, the functions assigned to the "FUNCTION" buttons by the above procedure will not work.
● "BUTTON 1-3" is set up in "HDMI1-3" in the factory.

DISABLE	Function button is disabled.
HDMI1 IN	Switches input to HDMI1 input.
HDMI2 IN	Switches input to HDMI 2 input
HDMI3 IN	Switches input to HDMI 3 input
COMPUTER IN	Switches input to computer input.
COMPONENT 1 IN	Switches input to component 1 input.
COMPONENT 2 IN	Switches input to component 2 input.
S-VIDEO IN	Switches input to S-video input.
VIDEO IN	Switches input to video input.
BLANK	Operates the shutter function. ● When the shutter operates at times such as when not using the projector for fixed periods, the pictures turn off and power consumption is reduced. ● When any button on the remote control or the projector's operation panel is pressed, the shutter function is cancelled and pictures can be projected again. ⎧ However, this does not apply for the ⎫ ⎨ remote control's "LIGHT" button and ⎬ ⎩ the system device operation buttons. ⎭
AUTO SETUP	Starts automatic position correction
CONTRAST	You can adjust the contrast of the projected image. Adjust the BRIGHTNESS in advance if necessary.
CONTRAST R/G/B	You can adjust the amount of contrast in RGB colours individually. Press ◄ ► to increase/decrease 1 point.

|	
DISABLE	Function button is disabled.
NORMAL	Setting for a general image, such as sports or games.
DYNAMIC	Bright and sharp setting.
COLOR1	Setting for HDTV standard in ITU-RBT. 709 and colour temperature 6500 K at the default setting of the PICTURE menu items.
COLOR2	Setting for DCDM standard(SMPTE431-2) and colour temperature 6300 K at the default setting of the PICTURE menu items.
CINEMA1	Hollywood style colours.
CINEMA2	Deeper and more rich colour setting.
CINEMA3	Vivid and crisp colour setting.
SPLIT ADJUST	You can perform image adjustment in some PICTURE menu items while displaying a certain area of the frozen image in a split window.
AUTO ADJUST	You can switch on/off the automatic adjustment system in each items.
MEMORY LOAD	You can access the saved settings instantly.
BRIGHTNESS	You can adjust the brightness of the projected image.
BRIGHTNESS R/G/B	You can adjust the brightness in RGB coloursindividually. Press ◄ ► to increase/decrease 1 point.

Editing displays on the LCD

When remote control signals for a home theatre system device have been learnt for the USER 1-3 function buttons, you can change the "-A-, -B-, -C-" displays on the LCD to your preferred displays.

List of characters that can be displayed
Upper-case letters: A-Z   Numerals: 0-9
Symbols: -, +, _, Q, ?, space

Editing the function button characters on the LCD

1 Press "DEVICE", use the tilt button to select the device, and then press "ENTER".
DEVICE
(Example: When "USER1" is selected)

2 Press "LEARN" for 3 seconds or more.

LEARN

3 Press the top or bottom of the tilt button to select "KEY EDIT?" and then press "ENTER".

● If "ERROR" is displayed
If no signals have been learned, "ERROR" will be displayed.

4 Press the function button to be changed.
(Example: When function B is selected)

5 Press the left or right sides of the tilt button to move to the character to be changed, and press the top or bottom of the tilt button to select the character.

►◄ :Display position
▲▼ :Character select
● During setting, the space character will be displayed as "⊠".
● To edit another character display, repeat steps 4 and 5.
6 Press "ENTER".

To finish, press "SETUP".   SETUP

Editing the device selection display

You can remove the indicators for system devices that are not being used, to reduce the number of button operations required when selecting system devices.

1 Press "SETUP" for 3 seconds or more.

SETUP
2 Use the tilt button to select "PJ", and then press "ENTER".
3 Use the tilt button to select "SRC EDIT?", and then press "ENTER".
4 Use the tilt button to select the display to be deleted, and then press "DEVICE".

DEVICE

● When "DEVICE" is pressed, the indicator will flash more slowly.
● To delete more than one indicator, repeat step 4.

5 Press "ENTER" and then press "SETUP".

SETUP

● Restoring indicators that have been deleted
In step 4 above, use the tilt button to select the indicator that you would like to display again, and then press "DEVICE".

Appendices

LCD display list

■ Selected device displays

Selected device display	Corresponding device
PJ	Projector (PT-AE2000U)
DVD	DVD player/DVD recorder
VCR	Video deck
TV/TNR	TV/Cable converter/Satellite receiver
AMP	Audio amplifier/Receiver
USER1/2/3	DVD, VCR, TV/TNR, AMP, other device (May include devices that cannot be learnt)

■ Display messages

LCD display	Description
CODE ?	Indicates that the mode for setting device codes is selected.
CODE ? ****	Displayed when a device code (4 digits) has been selected and entered.
DELAY *SEC	Displayed when a delay time has been set using the operation macro function.
DELAY * OK	Displayed when a delay time has been added correctly using the operation macro function.
DELETE ?	Indicates that the mode for deleting learnt remote control signals is selected.
DELETED	Displayed when a learnt function has been deleted.
END	Displayed when code searching of the database is complete.
ERROR	Displayed when an error occurs. Redo the operation.
EXIT SETUP	Displayed when setup mode has been exited.
KEY EDIT ?	Indicates that the mode for editing the function button display characters isselected.
LEARN ?	Indicates that the mode for learning remote control signals has been selected.
LEARNING	Displayed while remote control signals are being learnt.
MACRO ?	Indicates that the mode for setting the macro function has been selected.
MACRO* ?	Indicates that the mode for setting the operation macro function has been selected.
MC* DELETED	Indicates that an operation macro function has been cleared.
OK	Displayed when an operation is completed correctly.
OPS RESET ?	Indicates that the mode for resetting the functions learnt for USER1/2/3 has been selected.
PWR MACRO?	Indicates that the mode for setting a power supply macro has been selected.
RESET ?	Displayed when you are to select whether or not to reset.
RESET ERROR	Displayed when an error occurs during a reset operation. Redo the operation.
RESET OK	Displayed when the reset operation is successful.
SRC EDIT?	Indicates that the mode for editing the device selection display has been selected.
SAVED	Displayed when a button guide has been recorded.
SEL CODE	Displayed when a key that has been recorded using the operation macro function is selected.
SEL SOURCE	Displayed when selecting a device type.
SOURCE ?	Displayed when selecting a device to be operated.
TIMEOUT	Displayed when no operations have been carried out for 60 seconds, and the procedure has timed out.
TOTAL **	Indicates the number of keys that have been recorded correctly using the operation macro function.

■ List of display characters

	Character	Display character	Character	Display character	Character	Display character	Character	Display character	Character	Display character	Character	Display character
Letters	A		B		C		D		E		F	
	G		H		I		J		K		L	
	M		N		O		P		Q		R	
	S		T		U		V		W		X	
	Y		Z									
Numerals	1		2		3		4		5		6	
	7		8		9		0					
Symbols	—		--		+		÷		_		*	
	※		?				space					

The space is not indicated after the setting.

■ Function button guide

Selected device	Corresponding device	Function button display	Description
PJ	PT-AE2000U	FN1	Function1
		FN2	Function2
		FN3	Function3
DVD	DVD/DVD-R	HDD	Switch to hard disk (*1)
		DVD	Switch to DVD (*1)
		SUB	Sub-menu screen display
VCR	VCR	REC	Recording
		EPG	Program list
		EXT	Menu screen clear
TV /CBL /SAT	TV/Cable Converter /Satelite Receiver	INP	Input select/Broadcast select
		EPG	Program list
		LNG	Audio select
AMP/RCV	Audio Ampliflier /Receiver	DVD	Switch input to DVD (*2)
		VCR	Switch input to VCR (*2)
		TV	Switch input to TV (*2)
LIGHTING	Lighting equipment	OFF	Off
		CNT	Dimmed
		ON	Fully on
		SE1	Scene 1
		SE2	Scene 2
		SE3	Scene 3
		DWN	Make dimmer
		UP	Make brighter
SCREEN	Motor-driven screen	DWN	Lower
		STP	Stop
		UP	Raise
PJ	Macro Mode	MC1	Operation macro function 1
		MC2	Operation macro function 2
		MC3	Operation macro function 3
USER 1〜3	Macro Mode	MC4	Operation macro function 4
		MC5	Operation macro function 5
		MC6	Operation macro function 6

Note:

● The displayed button guide may not match the operation for some devices.
● Remote control signals may vary depending on the device being set, even if the manufacturer is the same.

※ 1：If either the HDD or DVD function button display is blank, operation will be as follows.

Selected device	Corresponding device	Function button display	Description
DVD	DVD/DVD-R	HDD	Switch to DVD and HDD in that order, or switch directly to HDD
		Empty	-
		SUB	Sub-menu screen display
DVD	DVD/DVD-R	Empty	-
		DVD	Switch to DVD and HDD in that order, or switch directly to DVD
		SUB	Sub-menu screen display

※ 2：The DVD, VCR or TV function button displays may operate as follows. (Select 1, 2 and 3 indicates input switches that differ depending on the selected device.)

Selected device	Corresponding device	Function button display	Description
AMP/RCV	Audio Ampliflier /tuner	DVD	Input switches to Input sequence (+) or select 1
		VCR	Input switches to Input sequence select (-) or select 2
		TV	Input switches to select 3

Note:

*1: Some devices may not allow you to turn the power back on after it has been turned off.

*2: When "TV" has been selected, these can be used for volume mute, volume + and volume -.

*3: May not work for some devices.

*4: When a device code has been set, the button guide is displayed when a remote control signal hasbeen set for that button. Furthermore, when functions have been learnt, "-A-", "-B-" and "-C-" are displayed as the defaults, and these LCD displays can be edited.

*5: If a TV, AMP or RCV has been set using a device code and the mode for the device has been set to DVD, VCR, CBL or SAT, these can be used for mute, volume + and volume - for the selected device's amplifier.

*6: LCD display will vary depending on the device selected.

*7: Only applicable to some types of lighting equipment.
